CyberHRMS

A Complete Guide to Every Module

Personnel · Organization · Planning · Recruitment · Performance
Career Development · Learning · Engagement · Compensation
Medical Benefit · Insurance · Employee Loan · Guarantee Commitments
Trip Management · Attendance & Leave · Reports

How to Use This Manual

Each chapter covers one module group from the sidebar. Every screen is described the same way: what it's for, exactly where to find it, numbered steps for the actions you'll take, notes on any field that isn't self-explanatory, and — where useful — a Tip or a Troubleshooting box.

Conventions used in this manual

- **Bold text** names a button, field, menu item, or screen exactly as it appears on screen.
- **Menu paths** are written as **Group** → **Screen**, matching the sidebar exactly (for example, **Personnel** → **Employees**).
- Numbered steps are performed in order, top to bottom.
- A green **Tip** box offers a helpful shortcut or a piece of context worth knowing.
- An amber **Troubleshooting** box lists a message you might see in quotes, followed by what it means and what to do.

Getting Started

This chapter covers everything you need before opening any HR module: signing in, finding your way around the workspace, and the tools that appear on every screen — the header, the sidebar, notifications, and global search.

1.1 Logging In

Menu: /login Who uses this: All users

CyberHRMS opens to a sign-in page. Use the username and password issued by your HR/IT administrator.

Steps

1. Open the CyberHRMS web address in your browser.
2. Type your **User Name** in the first field.
3. Type your **Password** in the second field. Click the eye icon to reveal what you typed if you want to check it.
4. Click **Sign In**.
5. If your credentials are correct you land on your **Dashboard**. If you belong to more than one company/tenant, you may first see a company picker — choose the correct organization.

TIP

Your session stays open while you use the system. If you step away, the system may sign you out automatically after a period of inactivity — simply log in again.

TROUBLESHOOTING

“Invalid username or password” Check Caps Lock and retype carefully. If it still fails, contact your HR administrator to confirm your account is active and reset your password if needed.

“The page keeps returning me to the login screen” Your session may have expired, or your account may not be assigned to any company yet. Contact your administrator.

1.2 The Workspace Layout

Menu: Every screen Who uses this: All users

Every screen in CyberHRMS shares the same frame: a collapsible sidebar of menus on the left, and a header bar across the top.

Field notes

- **Sidebar** — grouped by module (Personnel, Organization, Planning, Recruitment, Performance, and so on). Click a group heading to expand or collapse it; click any item inside to open that screen. Click the collapse arrow at the top of the sidebar to shrink it to icons only, useful on smaller screens.
- **Search box** (top-left, or press **Ctrl+K** / **⌘K**) — opens a global search pop-up. Type at least two characters to search across Employees, Departments, and Leave Requests at once; results are grouped by category and open with a single click.
- **Theme toggle** (sun/moon icon) — switches between light and dark appearance.
- **Language switcher** (globe icon) — changes the display language, where more than one is configured.
- **Notification bell** — shows a red badge when you have unread alerts (an approval waiting on you, a request status change, and similar events). Click it to open the list; click a notification to jump straight to the related screen.
- **Account menu** (your avatar, top-right) — sign out, and any account-related actions your administrator has enabled.

TIP

The global search (Ctrl+K) is usually the fastest way to jump to a specific employee, department, or leave request instead of navigating through the sidebar.

1.3 The Dashboard

Menu: / (Dashboard) Who uses this: All users

Your Dashboard is the landing page after login. What you see depends on your role: every user sees personal tiles (their leave balance, recent activity); managers and approvers additionally see an **Approvals** tab listing everything currently waiting on their decision.

Steps

1. After logging in, review the summary tiles at the top of the page for a quick status check.
2. If an **Approvals** tab is visible, click it to see every request currently waiting on your decision, across all modules (leave, recruitment, transfers, claims, and more).
3. Click any item in the Approvals list to open its comment dialog directly from the dashboard, or click the item itself to open the full record.
4. Use the **Recent Activity** panel to see what has recently changed on records relevant to you.

TIP

If you are a manager or HR administrator and do not see an Approvals tab, it means nothing is currently waiting on you — the tab appears automatically the moment a request needs your decision.

CHAPTER 02

Personnel

The Personnel group is where employee records live, along with the requests and events tied to an employee's time at the company: exits, transfers, discipline, and company property.

2.1 Employees

Menu: Personnel → Employees (/employee) Who uses this: HR Administrators, Managers (view within their unit)

The Employees screen is the master list of everyone in the organization. From here you create new employee records and open any employee's full profile.

The screenshot displays the CyberHRMS Employees screen. On the left, a sidebar lists various HR functions. The main content area is divided into two sections: 'Organization Structure' and 'All Employees'. The 'Organization Structure' shows a hierarchy of units and departments. The 'All Employees' section features a table with the following data:

EMPLOYEE	ORGANIZATION UNIT	POSITION	JOB GRADE	HIRE DATE
DA Dagmawi Abate Abebe 0001	HR Operation	HR Officer	02	2025-01-17
Bethlehem Admasu WoideMariyam B031	Finance Unit	Acting CFO	02	2022-03-10
DH Dawit Haile EMP-002				2023-01-10
MT Meron Tadesse EMP-004				2022-06-01
Gibriel Behailu Muezyen G006	Finance Unit	Finance Manager	14	2016-12-01
KY Kidist Yonas Shibeshi K001				2026-07-09
KY Kidist Yonas Shibeshi KY--001	Human Resource Unit	HR Officer	14	2024-01-01
Melona Michael Chernet	Finance Operation	Accountant I	01	2024-01-01

Steps

1. Open **Personnel** → **Employees**.
2. Use the search bar to find an employee by name or employee number, or use the column filters to narrow by department/status.
3. Click any row to open that employee's full profile.
4. To register a new employee, click the + button and complete the multi-tab form (see *Adding an Employee* below).

TIP

New hires from the Recruitment pipeline are usually created automatically through **Hire Employee** (Chapter 5) rather than added here by hand — use this screen's Add button mainly for employees entered directly (e.g. historical or manual records).

Adding or Editing an Employee

Menu: Personnel → Employees → + / ✎ Who uses this: HR Administrators

The employee form is organized into tabs so related information stays grouped. Move through each tab, filling in what applies.

The screenshot shows the 'Employees' management interface. The top navigation bar includes tabs for Personal & Identification, Education, Experience, Family, Movements, Annual Leave, Other Leave, Development, Guarantees, Discipline, Termination, Award, and Certifications. The main form is for 'Dagmawi Abate Abebe' (ID: #0001, Active). The 'Personal Details' tab is selected, showing fields for First Name, Father Name, Grandfather Name, Gender, Date of Birth (Gregorian and Ethiopian), First Name (Amharic), Father Name (Amharic), Grandfather Name (Amharic), Marital Status, and Place of Birth. A 'Save' button is visible in the top right.

Steps

1. On the **Personal Details** tab, enter the employee's name (first, father's, grandfather's name where applicable), date of birth, gender, marital status, and other personal identity fields shared across the system.
2. Switch to **Contact & Identification** and enter phone, email, address, and statutory identifiers such as National ID, TIN, and pension number.
3. Switch to **Employment & Placement** and select the employee's **Position** (this determines their department and job grade), **Employment Status**, **Employment Nature** (Permanent, Contract, etc.), hire date, and salary information.
4. If custom fields have been configured for your organization, fill in any additional tabs that appear.
5. Upload a photo using the photo control, if required.
6. Click **Save**.

Field notes

- Date fields throughout the system show **both a Gregorian and an Ethiopian calendar picker** side by side — set the date in whichever calendar is more convenient; the other updates automatically.
- Assigning a **Position** is what places the employee into an organizational unit — there is no separate "department" field to fill in.

"I can't find the position I need in the dropdown" Only **vacant** positions normally appear when placing a new hire. Ask an Organization administrator to check the Position Classes / Positions screens (Chapter 3) to confirm the seat exists and is unoccupied.

The Employee Profile

Menu: Personnel → Employees → (click a row)

Who uses this: HR Administrators, Managers, the employee themselves

Opening an employee shows their full profile across a set of tabs covering their entire record with the company.

Employees
Employee master data, education, experience and family details

Personal & Identification | Education | Experience | Family | Movements | Annual Leave | Other Leave | Development | Guarantees | Discipline | Termination | Award | Certifications

Dagmawi Abate Abebe
#0001 Active

Sections Save

Personal Details
Stored on the shared person record.

First Name *	Dagmawi	First Name (Amharic)	ዳግማዊ
Father Name	Abate	Father Name (Amharic)	አባት
Grandfather Name *	Abebe	Grandfather Name (Amharic)	አበበ
Gender *	Male	Marital Status *	Single
GREGORIAN Date of Birth 07/17/2026		Place of Birth AA	
ETHIOPIAN (ቅዳሜ)			

Field notes

- **Personal & Identification** — the core identity and contact information entered when the employee was created.
- **Education** — degrees, institutions, and fields of study; add multiple entries as needed.
- **Experience** — prior work history recorded for the employee.
- **Family** — dependents and emergency contacts.
- **Movements** — the history of transfers, promotions, and demotions for this employee (see 2.3, Transfer Requests).
- **Annual Leave / Other Leave** — this employee's leave requests and running balance (see Chapter 16).
- **Development** — training, career paths, and mentorships tied to this employee.
- **Guarantees** — any guarantee commitments this employee has made or benefited from (Chapter 14).
- **Discipline** — disciplinary case history (see 2.4).
- **Termination** — exit/termination details, populated once separation begins.

TIP

Most tabs let you add a new record directly (an education entry, a family member, and so on) without leaving the profile page.

2.2 My Exit

Menu: Personnel → My Exit (/myExit) Who uses this: Any employee (self-service)

Employees use this self-service screen to start their own resignation/exit process.

My Exit
Submit a resignation or early-retirement request and track your exit process.

Request a Voluntary Exit
Your request goes to HR and your manager for approval (resignation or early retirement). Involuntary cases are handled by HR.

Notice Date *
mm/dd/yyyy

Intended Last Working Date *
mm/dd/yyyy

Reason *
Why are you leaving?

Remarks

Submit Request

Steps

1. Open **Personnel** → **My Exit**.
2. Complete the exit request form: reason for leaving and your proposed last working day.
3. Click **Submit**. Your request now routes through the configured approval chain.
4. Return to this screen any time to see the current status — pending approval, approved and in clearance, or completed.
5. If an **Exit Questionnaire** becomes available once your termination is approved, a prompt appears here — see 2.6.

TIP

Once your exit is approved, HR will run the clearance process — you may see requests to return company assets or settle outstanding items before your final settlement is processed.

2.3 Transfer Requests

Menu: Personnel → Transfer Requests (/transferRequest) Who uses this: Employees, Managers, HR Administrators

A transfer request moves an employee to a different position or organizational unit. Any request goes through approval before it takes effect.

Transfer Requests

Request, assess and approve employee transfers — applied on the effective date

Request

Assessment

Request

Who moves, where to, when and why (HC170/171)

Employee *

Search employee...

Transfer Kind *

Department

Target Position (vacant) *

Select a vacant position

Preferred Start Date *

mm/dd/yyyy

Relocation Expense (est.)

Justification *

Why this transfer is requested

Remark

Submit Transfer Request

Steps

1. Open **Personnel** → **Transfer Requests**.
2. Click **+ Add** to start a new request.
3. Select the **Employee** to transfer, the **Target Position** (this determines the new unit and job grade), the requested **Effective Date**, and a **Reason**.
4. Click **Save** — the request enters the approval workflow.
5. Track status from this list; once every approval step is complete, the transfer is applied automatically on its effective date.

Field notes

- A transfer does not move the employee immediately on approval — it is scheduled and applied on the effective date you set, so the change lines up with payroll and reporting periods.
- The employee's **Movements** tab (on their profile) records every transfer once it takes effect.

2.4 Disciplinary Cases

Menu: Personnel → Disciplinary Cases (/disciplinaryCase) Who uses this: HR Administrators, Managers

Record and track formal disciplinary actions against an employee.

Disciplinary Cases

Raise and track disciplinary measures — routed for approval, with promotion/reward impact

3 records

EMPLOYEE	VIOLATION	MEASURE	VIOLATION DATE	LIFETIME	RAISED BY	STATUS	ACTION
Dagmawi Abebe 0001	Absentism	Verbal Warning	2026-08-04	open-ended	Michael Demsse	Open	Edit Delete
Bethlehem WoldeMariyam B031	Absenteeism	Written Warning	2026-07-01	until 2026-07-31 Promo Reward	Michael Demsse	Resolved	Edit Delete
Chaltu Gemedad EMP-003	Absent	Verbal Warning	2026-07-01	open-ended	HR	Resolved	Edit Delete

Steps

1. Open **Personnel** → **Disciplinary Cases**.
2. Click **+ Add**, choose the **Employee**, describe the incident, and select the disciplinary **Measure**.
3. Click **Save** to log the case.

Field notes

- An open disciplinary case can block certain actions for that employee — for example, being nominated for a reward — until the case is resolved.

2.5 Termination List

Menu: Personnel → Termination List (/terminationList) Who uses this: HR Administrators

The administrative view of every termination case in progress or completed — the HR counterpart to an employee's self-service My Exit screen.

[INSERT SCREENSHOT: The Termination List grid, showing each case's employee, type (resignation, dismissal, etc.), status, and clearance progress; opening a row shows the clearance checklist by department.]

Steps

1. Open **Personnel** → **Termination List**.
2. Click a case to review its details, approval history, and clearance checklist.
3. Once clearance is complete across all departments and any final settlement is recorded, mark the case as finalized.

"A department won't clear the employee" Contact that department directly — clearance departments (Chapter set up under Clearance Departments) each confirm independently that the employee has returned assets or settled obligations owed to them before the case can complete.

2.6 Exit Questionnaire

Menu: Personnel → Exit Questionnaire (/exitQuestionnaire)
Administrators (view results)

Who uses this: The exiting employee; HR

A short, optional survey offered to an employee once their termination is approved, to capture feedback on their experience.

 [INSERT SCREENSHOT: The Exit Questionnaire form — a short set of questions presented to the departing employee, with a **Submit** button.]

Steps

1. The questionnaire appears automatically for the exiting employee once HR launches it after termination approval.
2. Answer each question and click **Submit**.
3. The questionnaire disappears from your screen once submitted; HR can review the aggregated responses on their side.

Field notes

- HR can view results but cannot fill in the questionnaire on the employee's behalf — it stays strictly self-reported.

2.7 Company Assets

Menu: Personnel → Company Assets (/companyAsset)

Who uses this: HR Administrators

Track company property assigned to employees, so it can be verified and reclaimed during clearance.

 [INSERT SCREENSHOT: The 2.7 Company Assets list screen — grid of company assets (laptops, phones, ID cards, etc.), with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Personnel → Company Assets (/companyAsset)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Assign the asset to an employee, record its serial number/description, and set its status (in use, returned, lost).
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.

6. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
7. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" company assets (laptops, phones, ID cards, etc.) codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

2.8 Custom Fields

Menu: Personnel → Custom Fields (/employeeField)

Who uses this: HR Administrators

Extend the employee form with organization-specific fields, without needing a developer. Fields you define here appear automatically on the relevant employee tab.

 [INSERT SCREENSHOT: The 2.8 Custom Fields list screen — grid of custom fields on the employee form, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Personnel** → **Custom Fields (/employeeField)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

 [INSERT SCREENSHOT: The 2.8 Custom Fields form — showing the field editor — label, data type (text, number, date, dropdown), and which tab it should appear on.]

TIP

Use this when you need to capture something specific to your organization (e.g. a badge number or an internal certification) that isn't part of the standard employee form.

TROUBLESHOOTING

"This name already exists" custom fields on the employee form codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

2.9 Document Templates

Menu: Personnel → Document Templates (/documentTemplate)

Who uses this: HR Administrators

Build reusable letter/document templates with placeholders (like {{EmployeeName}}) that merge with real employee data when generated.

 [INSERT SCREENSHOT: The 2.9 Document Templates list screen — grid of correspondence templates (offer letters, certificates, notices), with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Personnel → Document Templates (/documentTemplate)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Use the rich-text editor to write the document, inserting placeholder tokens (shown in a side panel) wherever employee-specific data should appear.
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
6. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
7. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

 [INSERT SCREENSHOT: The 2.9 Document Templates form — showing the rich-text template editor with a toolbar and a list of insertable placeholder tokens.]

TIP

Once a template exists, you can generate a filled-in document straight from an employee's profile or from a list (for example, printing offer letters for several candidates at once) — look for a **Generate** or print icon on the relevant screen.

TROUBLESHOOTING

“This name already exists” correspondence templates (offer letters, certificates, notices) codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

Organization

This chapter covers the structural building blocks of the company: branches, the organizational unit hierarchy, positions, job grading, and reference lists used elsewhere in the system.

3.1 Branches

Menu: Organization → Branches (/branch) Who uses this: System Administrators

Branches represent physical or administrative locations. A user's assigned branch can restrict what data they see (branch-level isolation); Head Office users see everything.

 [INSERT SCREENSHOT: The 3.1 Branches list screen — grid of branches/locations, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Branches (/branch)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” branches/locations codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

3.2 Organization Structure

Menu: Organization → Organization Structure (/organizationUnit) Who uses this: HR/Organization Administrators

Define the company's hierarchy of business units, directorates, divisions, departments, and teams. This screen offers two views: a **Tree & Grid** editing view and a visual **Org Chart**.

 [INSERT SCREENSHOT: The Organization Structure screen in Tree & Grid view — a collapsible yellow-folder-style tree on the left (Business Unit → Directorate → Division →

Department → Team) and a grid of the selected level's units on the right, with an ****Org Chart**** toggle button.]

Steps

1. Open **Organization** → **Organization Structure**.
2. In **Tree & Grid** view, click a folder in the tree to see the units directly under it in the grid on the right.
3. Click + **Add** to create a new unit: choose its **Type** (Business Unit, Directorate, Division, Department, Team), its **Parent** unit, a code and name, and optionally an allocated headcount.
4. Click **Save**.
5. Switch to the **Org Chart** view (toggle button near the top) to see the whole hierarchy as a visual, card-based diagram.

 [INSERT SCREENSHOT: the Org Chart view — a tree of rounded cards, each with a colored top accent, an initials avatar, the unit name, a type chip, and headcount, connected by clean elbow connectors, with the toolbar (search, Levels, orientation, zoom, Export PDF) across the top]

Field notes

- In the Org Chart view, use the **search box** to jump to a specific unit by name or code — matching cards highlight while the rest dim.
- Use the **Levels** buttons (1 / 2 / 3 / All) to control how much of a large structure is expanded at once, and the **Horizontal/Vertical** toggle to change layout orientation.
- Drag to pan and use **Ctrl/⌘ + scroll wheel** (or the zoom buttons) to zoom; click **Fit** to reset the view to show everything.
- Click **Export PDF** to download the complete chart (every unit, fully expanded) as a print-ready, multi-page PDF — independent of whatever you currently have zoomed or collapsed on screen.

TIP

A unit's **manager** is whichever employee in that unit has the **Managerial** flag checked on their employee record — there is no separate "assign manager" screen. Set or change a unit's manager by editing the relevant employee.

3.3 Position Classes

Menu: Organization → Position Classes (/positionClass)

Who uses this: Organization Administrators

A Position Class is a reusable job definition (title, job grade, job category, work location, required qualifications) that one or more actual Positions can reference — define the job once, reuse it across units and branches.

 [INSERT SCREENSHOT: The 3.3 Position Classes list screen — grid of reusable job/position class definitions, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Position Classes (/positionClass)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Enter the job title, assign a Job Grade and Job Category, set required qualifications/experience, and optionally a reporting-to position class.
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
6. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.
7. To remove a record, click the trash () icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" reusable job/position class definitions codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

3.4 Positions

Menu: Organization → Positions (/position) Who uses this: Organization Administrators

A Position is one actual seat: it links a Position Class to a specific Organizational Unit (and Branch). This is what an employee is actually placed into.

 [INSERT SCREENSHOT: The 3.4 Positions list screen — grid of individual position seats within a unit, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Positions (/position)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Pick a Position Class and the Organization Unit it belongs to.
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
6. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.

7. To remove a record, click the trash (🗑️) icon on its row and confirm **Delete** in the dialog that appears.

TIP

The **Establishment Overview** (Chapter 4) shows, at a glance, how many positions in each unit are filled versus vacant.

TROUBLESHOOTING

“This name already exists” individual position seats within a unit codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

3.5 Job Grades

Menu: Organization → Job Grades (/jobGrade) Who uses this: Organization Administrators

Job Grades classify positions by level/seniority and link to the Salary Scale used for compensation.

 [INSERT SCREENSHOT: The 3.5 Job Grades list screen — grid of job grades, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Job Grades (/jobGrade)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑️) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” job grades codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

3.6 Salary Scale

Menu: Organization → Salary Scale (/salaryScale)

Who uses this: Compensation Administrators

The pay grid — steps and amounts associated with each Job Grade, used when computing an employee's compensation.

 [INSERT SCREENSHOT: The 3.6 Salary Scale list screen — grid of salary scale steps, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Salary Scale (/salaryScale)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TIP

Filter the grid by Job Grade using the dropdown above the table to review one grade's full step ladder at a time.

TROUBLESHOOTING

"This name already exists" salary scale steps codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

3.7 Job Categories

Menu: Organization → Job Categories (/jobCategory)

Who uses this: Organization Administrators

Maintain the list of job categories used throughout the system.

 [INSERT SCREENSHOT: The 3.7 Job Categories list screen — grid of job categories, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Job Categories (/jobCategory)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.

3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" job categories codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

3.8 Work Locations

Menu: Organization → Work Locations (/workLocation)

Who uses this: Organization Administrators

Maintain the list of work locations used throughout the system.

 [INSERT SCREENSHOT: The 3.8 Work Locations list screen — grid of work locations, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Organization** → **Work Locations (/workLocation)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" work locations codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 04

Planning

Workforce planning ties headcount ambitions to budget before recruitment ever opens a position.

4.1 Workforce Plans

Menu: Planning → Workforce Plans (/workforcePlan)
Heads, Finance, Executives

Who uses this: Planning Administrators, Directorate

A Workforce Plan proposes headcount changes (new positions, growth) for a period, anchored to the current establishment and gated by budget, then routed through a multi-level approval chain before it can fund recruitment.

 [INSERT SCREENSHOT: The Workforce Plans list, and a plan's detail screen showing its lines (proposed positions/headcount by unit), a budget-escalation indicator, and the approval progress bar.]

Steps

1. Open **Planning** → **Workforce Plans**.
2. Click **+ Add** to draft a new plan: set the planning period and add one or more lines, each specifying a unit, position class, and proposed headcount change.
3. If a line's cost exceeds the configured threshold, the system flags it for budget escalation automatically — no extra step needed on your part.
4. Click **Submit** to send the plan into its approval chain (typically Directorate → HR → Finance → Executive).
5. Track progress on the plan's detail screen; once fully approved, the additional headcount becomes available to Recruitment as approved demand.

Field notes

- Plans are versioned — revising an approved plan creates a new version and automatically archives the prior one, keeping a full history.

4.2 Establishment Overview

Menu: Planning → Establishment Overview (/establishmentOverview)
Administrators, Managers

Who uses this: HR/Organization

A read-only, at-a-glance view of position occupancy across the organization — how many seats exist, how many are filled, and how many are vacant, by unit.

 [INSERT SCREENSHOT: The Establishment Overview grid — one row per organizational unit, with columns for Total Positions, Filled, and Vacant, and a filter to drill into a specific unit.]

Steps

1. Open **Planning** → **Establishment Overview**.

2. Use the unit filter to narrow to a specific department or directorate.
3. Review the Filled/Vacant counts to identify where recruitment demand exists.

TIP

This is the same live vacancy count that gates new Hiring Requests in Recruitment — if a hiring request is rejected for exceeding vacancy, check here first.

CHAPTER 05

Recruitment

Recruitment follows a pipeline: a Hiring Request justifies the need, a Job Requisition advertises it, Candidates apply, and a successful candidate is hired into a real employee record.

5.1 Hiring Requests

Menu: Recruitment → Hiring Requests (/hiringRequest) Who uses this: Managers, Directorate Heads, HR, Finance

The starting point of recruitment: a manager requests permission to fill one or more vacant positions. The request is checked against live vacancy before it can even be submitted.

 [INSERT SCREENSHOT: The Hiring Requests list and the request form — target unit, position class, number of positions requested, justification, and (if applicable) a Budget Monitor panel.]

Steps

1. Open **Recruitment → Hiring Requests**.
2. Click + **Add**. Choose the **Organizational Unit** — as a manager, you can only request for your own department and its sub-departments.
3. Select the **Position Class** and the **Number of Positions**, and provide a justification.
4. Click **Save** — the system validates the requested count against live vacant seats before accepting the request, then routes it for approval.
5. Once approved, the request becomes available to convert into a Job Requisition.

TROUBLESHOOTING

“Requested positions exceed available vacancy” The unit does not currently have enough vacant seats of that position class. Check **Establishment Overview** (4.2) or submit a Workforce Plan (4.1) first if you need to grow headcount rather than just fill an existing vacancy.

5.2 Job Requisitions

Menu: Recruitment → Job Requisitions (/jobRequisition) Who uses this: HR Administrators, Recruiters

Turns an approved Hiring Request into an actual job posting, with the ability to rank applicants once they come in.

 [INSERT SCREENSHOT: The Job Requisitions list, the requisition form (posting title, description, closing date), and the candidate ranking modal showing applicants scored side by side.]

Steps

1. Open **Recruitment** → **Job Requisitions** and click **+ Add**.
2. Select the approved **Hiring Request** it fulfills, then write the public posting title, description, and set a closing date.
3. Click **Save** and submit for approval; once approved, the posting becomes open for applications.
4. As applications arrive (5.4), open the requisition and use the **Ranking** view to compare candidates side by side against the position's requirements.

5.3 Candidates

Menu: Recruitment → Candidates (/candidate)

Who uses this: HR Administrators, Recruiters

The master list of everyone who has applied to any posting — a candidate can apply to multiple requisitions over time.

 [INSERT SCREENSHOT: The 5.3 Candidates list screen — grid of candidate profiles, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Recruitment** → **Candidates (/candidate)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Enter the candidate's contact details, resume/CV upload, and skills — used for matching against open requisitions.
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
6. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.
7. To remove a record, click the trash () icon on its row and confirm **Delete** in the dialog that appears.

TIP

A candidate must consent to their data being retained; the system tracks this consent and can anonymize a candidate's record on request.

TROUBLESHOOTING

"This name already exists" candidate profiles codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

5.4 Applications

Menu: Recruitment → Applications (/jobApplication)

Who uses this: HR Administrators, Recruiters, Hiring Managers

Track each candidate's application to a specific requisition through its stages: applied, screened, interviewed, offered, hired, or rejected.

 [INSERT SCREENSHOT: The Applications list with a stage/status column, and an application's detail view showing the stage log, interview scheduling, and an offer panel.]

Steps

1. Open **Recruitment** → **Applications** to see every application and its current stage.
2. Open an application to move it through its pipeline: schedule an interview, record interview feedback, and advance or reject the candidate.
3. When ready to make an offer, use the offer panel to generate an offer (based on an Offer Letter Template, 5.7) and send it for approval.
4. Once an offer is accepted, the application is ready to be finalized via **Hire Employee** (5.5).

TIP

Every stage change is logged, so you always have a complete audit trail of how a candidate moved through the process.

5.5 Hire Employee

Menu: Recruitment → Hire Employee (/hireEmployee)

Who uses this: HR Administrators

The final step of recruitment: converts an accepted candidate into a real employee record and places them into a position — internal candidates are routed through a transfer instead of creating a duplicate employee.

 [INSERT SCREENSHOT: The Hire Employee wizard — select the accepted application, confirm the position to place them in, and complete any remaining employment details before finalizing.]

Steps

1. Open **Recruitment** → **Hire Employee**.
2. Select the candidate/application to hire.
3. Confirm the **Position** they will occupy (defaults to the requisition's target, but can be adjusted if a suitable vacant seat exists elsewhere).
4. Complete any remaining employment fields not already captured, and click **Hire**.
5. The employee now appears in **Personnel** → **Employees**, and the position is marked occupied.

Field notes

- If the hire is an existing employee moving internally (an internal candidate), the system creates a transfer/movement instead of a second employee record, so their history stays continuous.

5.6 Talent Pool

Menu: Recruitment → Talent Pool (/talentPool)

Who uses this: HR Administrators, Recruiters

A shortlist of strong candidates you want to keep on file for future openings, separate from any specific requisition.

 [INSERT SCREENSHOT: The 5.6 Talent Pool list screen — grid of promising candidates kept for future openings, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Recruitment** → **Talent Pool (/talentPool)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” promising candidates kept for future openings codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

5.7 Offer Letter Template

Menu: Recruitment → Offer Letter Template (/offerLetterTemplate)

Who uses this: HR Administrators

The template used to generate offer letters during the Applications stage — same placeholder-merge mechanism as Document Templates (2.9).

 [INSERT SCREENSHOT: The 5.7 Offer Letter Template list screen — grid of offer letter templates, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Recruitment** → **Offer Letter Template (/offerLetterTemplate)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.

4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" offer letter templates codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 06

Performance

Performance management runs on a review cycle: objectives cascade down, employees and managers score an appraisal against a template, peers can weigh in, and the results feed recognition and development.

6.1 Performance Dashboard

Menu: Performance → Performance Dashboard (/performanceDashboard)

Who uses this: HR Administrators, Managers

A summary view of appraisal completion, average scores, and goal progress across the organization or a selected team.

 [INSERT SCREENSHOT: The Performance Dashboard — KPI tiles (appraisals completed, average score, goals on track) and charts breaking results down by department or cycle.]

Steps

1. Open **Performance** → **Performance Dashboard**.
2. Use any filters (cycle, department) to narrow the view.
3. Review the tiles and charts for a quick read on how the current review cycle is progressing.

6.2 Rating Scales

Menu: Performance → Rating Scales (/ratingScale)

Who uses this: HR Administrators

Define the numeric scale and labels (e.g. 1 = Needs Improvement ... 5 = Outstanding) that appraisal scoring uses.

 [INSERT SCREENSHOT: The 6.2 Rating Scales list screen — grid of rating scales (e.g. 1–5) used to score appraisals, with the **++ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Rating Scales (/ratingScale)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" rating scales (e.g. 1–5) used to score appraisals codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.3 Competencies

Menu: Performance → Competencies (/competency)

Who uses this: HR Administrators

The library of behavioral/technical competencies used in appraisals and position requirements.

 [INSERT SCREENSHOT: The 6.3 Competencies list screen — grid of competencies employees can be assessed against, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance → Competencies (/competency)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" competencies employees can be assessed against codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.4 Competency Categories

Menu: Performance → Competency Categories (/competencyCategory)

Who uses this: HR Administrators

Maintain the list of groupings for competencies used throughout the system.

 [INSERT SCREENSHOT: The 6.4 Competency Categories list screen — grid of groupings for competencies, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Competency Categories (/competencyCategory)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" groupings for competencies codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.5 Position Competencies

Menu: Performance → Position Competencies (/positionCompetency)

Who uses this: HR Administrators

Map which competencies matter for which Position Class — used for gap analysis in career and succession planning.

 [INSERT SCREENSHOT: The 6.5 Position Competencies list screen — grid of required competencies per position class, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Position Competencies (/positionCompetency)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" required competencies per position class codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.6 Review Cycles

Menu: Performance → Review Cycles (/reviewCycle)

Who uses this: HR Administrators

Maintain the list of review cycles (the recurring appraisal periods, e.g. annual or semi-annual) used throughout the system.

 [INSERT SCREENSHOT: The 6.6 Review Cycles list screen — grid of review cycles (the recurring appraisal periods, e.g. annual or semi-annual), with the **++ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Review Cycles (/reviewCycle)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" review cycles (the recurring appraisal periods, e.g. annual or semi-annual) codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.7 Appraisal Templates

Menu: Performance → Appraisal Templates (/appraisalTemplate)

Who uses this: HR Administrators

Define the structure of an appraisal form: which sections, goal weighting, and competencies it includes.

 [INSERT SCREENSHOT: The 6.7 Appraisal Templates list screen — grid of appraisal templates, with the **++ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Appraisal Templates (/appraisalTemplate)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" appraisal templates codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.8 Organizational Objectives

Menu: Performance → Organizational Objectives (/organizationalObjective)

Who uses this: Executives, HR Administrators

Top-level objectives for the organization or a unit, which individual Employee Goals can be linked to so performance ladders up to company strategy.

 [INSERT SCREENSHOT: The Organizational Objectives list and form — title, owning unit, description, and target period.]

Steps

1. Open **Performance** → **Organizational Objectives** and click + **Add**.
2. Enter the objective, the owning unit, and its target period, then **Save**.

6.9 Employee Goals

Menu: Performance → Employee Goals (/employeeGoal)

Who uses this: Employees, Managers

Individual goals an employee is working toward during a review cycle, optionally linked to an Organizational Objective.

 [INSERT SCREENSHOT: The Employee Goals screen — a list of an employee's goals with progress indicators, and a form to add a new goal with a title, description, target, and linked objective.]

Steps

1. Open **Performance** → **Employee Goals**.

2. Click **+ Add**, describe the goal, optionally link it to an Organizational Objective, set a target/due date, and **Save**.
3. Update the goal's progress over the cycle as work advances; goal completion feeds into the employee's appraisal.

6.10 Appraisals

Menu: Performance → Appraisals (/appraisal)

Who uses this: Employees, Managers, HR Administrators

The core performance review: an employee and their manager score performance against the cycle's template, with an optional peer-review and calibration step.

 [INSERT SCREENSHOT: The Appraisals list showing each employee's cycle status (Self-Assessment, Manager Review, Completed, etc.), and the appraisal scoring workspace with sections for goals, competencies, and an overall rating.]

Steps

1. Open **Performance** → **Appraisals** to see appraisals assigned to you (as the subject) or your team (as a manager).
2. Open an appraisal at the **Self-Assessment** stage as the employee: score yourself against each goal/competency section and add comments, then submit.
3. As the manager, open the same appraisal once self-assessment is submitted: review, adjust scores if needed, add comments, and submit your review.
4. If peer review is part of the cycle, invite peers from the appraisal screen (see 6.11) before finalizing.
5. Once every required stage is complete, the appraisal is finalized with an overall rating.

Field notes

- Appraisals do not use the generic Approve/Reject buttons found elsewhere — advance them using the stage-specific actions (Submit Self-Assessment, Submit Manager Review, and so on) on the appraisal screen itself.

TIP

A final rating can automatically trigger recognition (for high performers) depending on your organization's configuration — see Recognition (6.15).

6.11 My Peer Reviews

Menu: Performance → My Peer Reviews (/myPeerReviews)

Who uses this: Any employee invited as a peer reviewer

If a colleague's manager invites you to give feedback on their appraisal, your pending peer-review requests appear here.

 [INSERT SCREENSHOT: The My Peer Reviews list — pending review invitations with the subject employee's name and a form to score and comment.]

Steps

1. Open **Performance** → **My Peer Reviews**.
2. Click a pending invitation.
3. Complete the requested rating and comments, then **Submit**.

6.12 Appeals

Menu: Performance → Appeals (/appraisalAppeal)

Who uses this: Employees, HR Administrators

If an employee disagrees with their final appraisal outcome, they can raise a formal appeal here for HR to review.

 [INSERT SCREENSHOT: The 6.12 Appeals list screen — grid of appraisal appeals, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Appeals (/appraisalAppeal)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" appraisal appeals codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.13 Calibration

Menu: Performance → Calibration (/calibration)

Who uses this: HR Administrators, Senior Managers

A session where a group of managers compares and adjusts ratings across their teams together, to keep scoring consistent across the organization.

 [INSERT SCREENSHOT: The Calibration session screen — a table of employees and their proposed ratings from multiple appraisals, with controls to adjust and finalize.]

Steps

1. Open **Performance** → **Calibration** and open (or start) a session for the current cycle.

2. Review the ratings pulled in from individual appraisals side by side.
3. Adjust and finalize as agreed by the calibration panel.

6.14 Development Plans

Menu: Performance → Development Plans (/developmentPlan)

Who uses this: Managers, HR Administrators

Structured plans addressing an employee's growth areas, often created following an appraisal.

 [INSERT SCREENSHOT: The 6.14 Development Plans list screen — grid of individual development plans, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Development Plans (/developmentPlan)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" individual development plans codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.15 Improvement Plans

Menu: Performance → Improvement Plans (/improvementPlan)

Who uses this: Managers, HR Administrators

A formal plan with milestones for an employee whose performance needs to improve, tracked over a defined period.

 [INSERT SCREENSHOT: The 6.15 Improvement Plans list screen — grid of performance improvement plans, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Performance** → **Improvement Plans (/improvementPlan)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.

5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" performance improvement plans codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

6.16 Achievements & Recognition

Menu: Performance → Achievements, Recognition, Recognition Wall, My Points, Award Nominations, Recognition Badges, Award Categories, Recognition Programs, Reward Payouts Who uses this: All employees; HR Administrators for configuration

A family of screens that let managers and peers recognize good work with badges, points, and — for monetary awards — an approval and payout trail.

 [INSERT SCREENSHOT: The Recognition Wall — a public feed of recognition cards (employee, badge, reason), and the My Points screen showing an employee's running points balance with a redemption option.]

Steps

1. To nominate a colleague: open **Award Nominations**, click **+ Add**, choose the nominee and the badge, write the justification, and **Save** — it routes for approval.
2. Once approved, the recognition is automatically granted, points are credited, and (for public badges) it appears on the **Recognition Wall**.
3. Check your own running total any time on **My Points**.

Field notes

- **Achievements** — a log of notable accomplishments recorded against an employee.
- **Award Nominations** — anyone (typically a manager or peer) nominates an employee for a badge; nominations are approved before the recognition is granted.
- **Recognition** — the record of a granted recognition (badge + reason + who gave it).
- **Recognition Wall** — a public feed of granted recognitions across the company, for visibility and morale.
- **My Points** — your personal running points balance from recognitions received, with an option to redeem points where configured.
- **Recognition Badges / Award Categories / Recognition Programs** — HR-administered configuration defining what badges exist, their point value, and any themed recognition programs (e.g. "Employee of the Quarter").

- **Reward Payouts** — for badges with a monetary value, HR tracks and marks disbursement here once approved.

CHAPTER 07

Career Development

Career Development covers succession planning for critical roles, structured career paths employees can progress along, and mentorship pairings.

7.1 Critical Positions

Menu: Career Development → Critical Positions (/criticalPosition)

Who uses this: HR Administrators, Executives

Flag a position as critical to the business, which anchors succession planning — a critical position should always have a ready successor identified.

 [INSERT SCREENSHOT: The 7.1 Critical Positions list screen — grid of positions flagged as business-critical, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Career Development** → **Critical Positions (/criticalPosition)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” positions flagged as business-critical codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

7.2 Talent Reviews

Menu: Career Development → Talent Reviews (/talentReview)

Who uses this: HR Administrators, Senior Managers

A structured review session assessing employees' performance and potential together (a 9-box style talent grid) ahead of succession planning.

 [INSERT SCREENSHOT: The Talent Review screen — a 9-box grid plotting employees by performance vs. potential.]

Steps

1. Open **Career Development** → **Talent Reviews**.
2. Start or open a session and place/review employees on the performance–potential grid.
3. Save the session — its output feeds Succession Plans.

7.3 Succession Plans

Menu: Career Development → Succession Plans (/successionPlan)
Executives

Who uses this: HR Administrators,

For each critical position, identify and track one or more ready (or in-development) successor candidates.

 [INSERT SCREENSHOT: The Succession Plans screen — a critical position with a list of candidate successors, each showing a readiness level and development actions.]

Steps

1. Open **Career Development** → **Succession Plans** and select a critical position.
2. Add candidate successors and set their **readiness level**.
3. Add development actions for each candidate (training, stretch assignments) and track completion over time.

7.4 Career Paths

Menu: Career Development → Career Paths (/careerPath)

Who uses this: HR Administrators

Define a structured progression of positions/steps an employee can advance through, with the competencies required at each step.

 [INSERT SCREENSHOT: The Career Paths screen — a path with its ordered steps, each listing required competencies.]

Steps

1. Open **Career Development** → **Career Paths** and click + **Add**.
2. Name the path and add its ordered steps, each linked to a Position Class and its required competencies.
3. **Save**.

7.5 Employee Career Paths

Menu: Career Development → Employee Career Paths (/employeeCareerPath)
Managers

Who uses this: HR Administrators,

Assign an employee to a defined Career Path and track their progress along it — the system calculates progress automatically as steps are completed.

 [INSERT SCREENSHOT: An employee's assigned career path with a visual progress indicator across its steps.]

Steps

1. Open **Career Development** → **Employee Career Paths**.
2. Assign an employee to a Career Path.
3. Review their calculated progress percentage as they complete steps.

7.6 Mentorships

Menu: Career Development → Mentorships (/mentorship)

Who uses this: HR Administrators, Mentors, Mentees

Pair a mentor with a mentee and track the relationship.

 [INSERT SCREENSHOT: The 7.6 Mentorships list screen — grid of mentor/mentee pairings, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Career Development** → **Mentorships (/mentorship)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” mentor/mentee pairings codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

7.7 Path Change Requests

Menu: Career Development → Path Change Requests (/careerPathChangeRequest)

Who uses this: Employees, Managers, HR Administrators

A formal request for an employee to switch to a different Career Path, routed through approval.

 [INSERT SCREENSHOT: The Path Change Requests list and form — current path, requested new path, and justification.]

Steps

1. Open **Career Development** → **Path Change Requests** and click + **Add**.

2. Select the employee, the requested new Career Path, and a justification.
3. **Save** to submit for approval.

CHAPTER 08

Learning

Learning covers training needs identification, session scheduling and enrollment, certifications, and learning communities.

8.1 My Training

Menu: Learning → My Training (/myTraining)

Who uses this: Any employee (self-service)

Your personal training dashboard: sessions you're enrolled in, certifications you hold, and training needs raised for you.

 [INSERT SCREENSHOT: The My Training screen — upcoming enrolled sessions, a certifications list, and a button to submit a new training need.]

Steps

1. Open **Learning** → **My Training**.
2. Review your upcoming sessions and current certifications.
3. To request training, click **Request Training Need**, describe what you need and why, and **Submit** for approval.

8.2 Communities

Menu: Learning → Communities (/learningCommunity)

Who uses this: Any employee

Join topic-based communities to share resources and discuss with colleagues who have similar interests.

 [INSERT SCREENSHOT: The 8.2 Communities list screen — grid of learning communities / interest groups, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Learning** → **Communities (/learningCommunity)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

"This name already exists" learning communities / interest groups codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

8.3 Training Needs

Menu: Learning → Training Needs (/trainingNeed)

Who uses this: Employees, Managers, HR Administrators

A formal identification of a training gap, routed for approval before budget/scheduling is committed. Local and Abroad needs may follow different approval chains given the higher cost of the latter.

 [INSERT SCREENSHOT: The Training Needs list and form — employee, training type (Local/Abroad), course/topic, and justification.]

Steps

1. Open **Learning** → **Training Needs** and click **+ Add**.
2. Select the employee, the type (Local or Abroad), the topic/course needed, and a justification.
3. **Save** to route for approval.

8.4 Training Sessions

Menu: Learning → Training Sessions (/trainingSession)

Who uses this: HR Administrators, Training Coordinators

Schedule an actual delivery of a course — dates, venue/provider, capacity — and manage who is enrolled.

 [INSERT SCREENSHOT: The Training Sessions list and a session's detail screen showing enrolled participants with an add/remove control.]

Steps

1. Open **Learning** → **Training Sessions** and click **+ Add**.
2. Select the **Course**, set dates, venue or provider, and capacity, then **Save**.
3. Open the session to manage enrollments — add employees from approved training needs, or enroll directly.

8.5 Course Catalog

Menu: Learning → Course Catalog (/trainingCourse)

Who uses this: HR Administrators

Maintain the list of the catalog of available courses used throughout the system.

 [INSERT SCREENSHOT: The 8.5 Course Catalog list screen — grid of the catalog of available courses, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Learning** → **Course Catalog (/trainingCourse)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the catalog of available courses codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

8.6 Training Categories

Menu: Learning → Training Categories (/trainingCategory)

Who uses this: HR Administrators

Maintain the list of training categories used throughout the system.

 [INSERT SCREENSHOT: The 8.6 Training Categories list screen — grid of training categories, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Learning** → **Training Categories (/trainingCategory)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" training categories codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

8.7 Learning Paths

Menu: Learning → Learning Paths (/learningPath)

Who uses this: HR Administrators, Employees

A curated sequence of courses building toward a skill or role, similar in spirit to a Career Path but focused purely on learning content.

 [INSERT SCREENSHOT: The Learning Paths screen — a path with its ordered list of courses and a progress indicator for an enrolled employee.]

Steps

1. Open **Learning** → **Learning Paths** and click + **Add**.
2. Name the path and add its ordered courses.
3. **Save**.

8.8 Certifications

Menu: Learning → Certifications (/trainingCertificate)

Who uses this: HR Administrators, Employees

Record certifications earned by employees, including issue and expiry dates.

 [INSERT SCREENSHOT: The 8.8 Certifications list screen — grid of employee certifications, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Learning** → **Certifications (/trainingCertificate)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TIP

Use the print/generate option to produce a certificate document from a Document Template, where configured.

TROUBLESHOOTING

"This name already exists" employee certifications codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

8.9 Training Budgets

Menu: Learning → Training Budgets (/trainingBudget)

Who uses this: Finance, HR Administrators

Maintain the list of training budget allocations used throughout the system.

 [INSERT SCREENSHOT: The 8.9 Training Budgets list screen — grid of training budget allocations, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Learning → Training Budgets (/trainingBudget)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash () icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" training budget allocations codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

8.10 Provider Payments

Menu: Learning → Provider Payments (/trainingProviderPayment)

Who uses this: Finance, HR Administrators

Maintain the list of payments to external training providers used throughout the system.

 [INSERT SCREENSHOT: The 8.10 Provider Payments list screen — grid of payments to external training providers, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Learning** → **Provider Payments (/trainingProviderPayment)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" payments to external training providers codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

Engagement

Engagement tools give employees a voice — suggestions, grievances, and surveys — and give HR a way to broadcast announcements.

9.1 News & Announcements

Menu: Engagement → News & Announcements (/newsFeed)

Who uses this: All employees

The employee-facing feed of company announcements — the read-only counterpart to Manage Announcements (9.5).

 [INSERT SCREENSHOT: The News & Announcements feed — a chronological list of announcement cards with title, body, and date.]

Steps

1. Open **Engagement** → **News & Announcements** to browse current announcements.
2. Click any item to read the full announcement.

9.2 Surveys & Polls

Menu: Engagement → Surveys & Polls (/surveyTake)

Who uses this: All employees (invited participants)

Where you respond to a survey or poll HR has published to you.

 [INSERT SCREENSHOT: The Surveys & Polls screen — a list of open surveys, and the survey-taking form with its questions.]

Steps

1. Open **Engagement** → **Surveys & Polls**.
2. Click an open survey.
3. Answer each question and click **Submit**.

Field notes

- Surveys can be configured to collect responses anonymously — check the survey's introduction text if you're unsure.

9.3 Suggestions

Menu: Engagement → Suggestions (/suggestion)

Who uses this: All employees

Submit an improvement idea directly to HR/management, optionally anonymously.

 [INSERT SCREENSHOT: The Suggestions screen — a simple submission form and, below it, a list of your past suggestions with any HR response.]

Steps

1. Open **Engagement** → **Suggestions**.
2. Write your suggestion in the form and click **Submit**.
3. Check back on this screen for any response from HR.

9.4 Grievances

Menu: Engagement → Grievances (/grievance)

Who uses this: All employees, HR Administrators

A confidential channel to raise a workplace concern. Your direct manager cannot view grievances you raise, to keep the channel safe to use.

 [INSERT SCREENSHOT: The Grievances screen — a submission form and a list of your submitted grievances with status (Open, Under Review, Resolved).]

Steps

1. Open **Engagement** → **Grievances**.
2. Click **+ Add**, describe your concern in detail, and **Submit**.
3. Track its status from this list; HR will follow up as it progresses.

TIP

If you need to escalate urgently, use whatever direct HR contact channel your organization has outside the system as well — this screen tracks the formal case but is not a substitute for urgent in-person escalation.

9.5 Manage Announcements

Menu: Engagement → Manage Announcements (/announcement)

Who uses this: HR Administrators

Author and publish the announcements employees see on the News & Announcements feed (9.1).

 [INSERT SCREENSHOT: The 9.5 Manage Announcements list screen — grid of company announcements, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Engagement** → **Manage Announcements (/announcement)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Write the title and body, choose the audience/target (company-wide or specific units), and an optional publish/expiry date.
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
6. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.

7. To remove a record, click the trash (🗑️) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" company announcements codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

9.6 Survey Builder

Menu: Engagement → Survey Builder (/survey)

Who uses this: HR Administrators

Design a survey or poll: its questions, question types, and target audience, before publishing it for employees to take (9.2).

 [INSERT SCREENSHOT: The Survey Builder — a form for the survey's title/description plus a question editor supporting multiple question types (multiple-choice, rating, free text).]

Steps

1. Open **Engagement** → **Survey Builder** and click + **Add**.
2. Enter the survey title and description.
3. Add questions one at a time, choosing a question type for each (multiple choice, rating scale, free text).
4. Set the target audience and, if desired, mark it anonymous.
5. **Save** and publish — it now appears under Surveys & Polls (9.2) for the target audience.

CHAPTER 10

Compensation

Compensation covers what an employee is paid — salary, allowances, and benefits — and the requests and revisions that change it.

10.1 My Compensation

Menu: Compensation → My Compensation (/myCompensation) Who uses this: Any employee (self-service)

Your personal compensation summary: base salary, allowances, and deductions.

 [INSERT SCREENSHOT: The My Compensation screen — a breakdown of base pay, each active allowance, and deductions, with a net total.]

Steps

1. Open **Compensation** → **My Compensation** to review your current pay breakdown.

10.2 Employee Compensation

Menu: Compensation → Employee Compensation (/employeeCompensation) Who uses this: HR/Compensation Administrators

The administrative view and editor for an individual employee's compensation package.

 [INSERT SCREENSHOT: The 10.2 Employee Compensation list screen — grid of each employee's compensation record, with the **++ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Compensation** → **Employee Compensation (/employeeCompensation)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” each employee's compensation record codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

10.3 Salary Revisions

Menu: Compensation → Salary Revisions (/salaryRevision)

Who uses this: HR Administrators, Finance, Executives

Propose a salary change for an employee (a raise, adjustment, or grade-driven change), with a simulation preview before it is submitted for approval.

 [INSERT SCREENSHOT: The Salary Revisions form — current vs. proposed salary with a live simulation of the net effect, and a **Submit** button.]

Steps

1. Open **Compensation** → **Salary Revisions** and click **+ Add**.
2. Select the employee and enter the proposed new salary or grade.
3. Review the simulation panel showing the effect before submitting.
4. Click **Submit** — it routes through HR → Finance → Executive approval.

10.4 Benefit Plans

Menu: Compensation → Benefit Plans (/benefitPlan)

Who uses this: HR Administrators

Maintain the list of benefit plans used throughout the system.

 [INSERT SCREENSHOT: The 10.4 Benefit Plans list screen — grid of benefit plans, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Compensation** → **Benefit Plans (/benefitPlan)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” benefit plans codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

10.5 Allowance Types

Menu: Compensation → Allowance Types (/allowanceType)

Who uses this: HR Administrators

Maintain the list of allowance types (transport, housing, etc.) used throughout the system.

 [INSERT SCREENSHOT: The 10.5 Allowance Types list screen — grid of allowance types (transport, housing, etc.), with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Compensation → Allowance Types (/allowanceType)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” allowance types (transport, housing, etc.) codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

10.6 Income Tax & Deductions

Menu: Compensation → Income Tax & Deductions (/taxBracket)

Who uses this: HR/Finance Administrators

Configure the progressive tax brackets and deduction rules the system applies automatically when computing net pay.

 [INSERT SCREENSHOT: The 10.6 Income Tax & Deductions list screen — grid of tax brackets and standard deductions, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Compensation → Income Tax & Deductions (/taxBracket)** from the sidebar.

2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" tax brackets and standard deductions codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

10.7 Compensation Requests

Menu: Compensation → Compensation Requests (/compensationRequest)

Who uses this: Employees, Managers, HR Administrators

A general-purpose channel for an employee or manager to formally request a compensation-related change or raise a compensation concern.

 [INSERT SCREENSHOT: The Compensation Requests list and a simple submission form.]

Steps

1. Open **Compensation** → **Compensation Requests** and click + **Add**.
2. Describe the request and submit.

CHAPTER 11

Medical Benefit

Medical Benefit covers employee medical plan enrollment and the claims process, from submission through HR and Finance approval to reimbursement.

11.1 My Medical Claims

Menu: Medical Benefit → My Medical Claims (/myMedicalClaims)

Who uses this: Any enrolled employee (self-service)

Submit and track your own medical reimbursement claims.

 [INSERT SCREENSHOT: The My Medical Claims screen — a list of your past claims with status, and a submission form with an attachment uploader for receipts.]

Steps

1. Open **Medical Benefit** → **My Medical Claims** and click **+ Add**.
2. Enter the expense details, category, and amount, and attach supporting documents (receipts/invoices).
3. Click **Submit** — the system checks your coverage/limit automatically and routes the claim to HR, then Finance, for approval.
4. Track status here; approved claims proceed to reimbursement.

TROUBLESHOOTING

“My claim was rejected for exceeding a limit” Each plan has category-specific coverage limits. Check your plan's limits under your enrollment details, or contact HR if you believe the limit was applied incorrectly.

11.2 Medical Claims

Menu: Medical Benefit → Medical Claims (/medicalClaim)

Who uses this: HR Administrators, Finance

Review, approve/reject, and track every claim in the organization; approving here advances a claim through its HR → Finance chain.

 [INSERT SCREENSHOT: The 11.2 Medical Claims list screen — grid of the administrative queue of all medical claims, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Medical Benefit** → **Medical Claims (/medicalClaim)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.

4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the administrative queue of all medical claims codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

11.3 Medical Enrollment

Menu: Medical Benefit → Medical Enrollment (/medicalEnrollment)
Administrators

Who uses this: Employees, HR

Enroll an employee (and their eligible beneficiaries/dependents) into a Medical Plan.

 [INSERT SCREENSHOT: The Medical Enrollment form — plan selection, and a beneficiaries sub-list where dependents are added.]

Steps

1. Open **Medical Benefit → Medical Enrollment** and click + **Add**.
2. Select the employee and the **Medical Plan**.
3. Add beneficiaries (eligible dependents) in the sub-list.
4. **Save**.

11.4 Medical Plans

Menu: Medical Benefit → Medical Plans (/medicalPlan)

Who uses this: HR Administrators

Maintain the list of medical plans and their coverage rules used throughout the system.

 [INSERT SCREENSHOT: The 11.4 Medical Plans list screen — grid of medical plans and their coverage rules, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Medical Benefit → Medical Plans (/medicalPlan)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.

5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" medical plans and their coverage rules codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

11.5 Medical Providers

Menu: Medical Benefit → Medical Providers (/medicalProvider)

Who uses this: HR Administrators

Maintain the list of approved medical providers/hospitals used throughout the system.

 [INSERT SCREENSHOT: The 11.5 Medical Providers list screen — grid of approved medical providers/hospitals, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Medical Benefit → Medical Providers (/medicalProvider)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" approved medical providers/hospitals codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

11.6 Service Contracts

Menu: Medical Benefit → Service Contracts (/medicalContract)

Who uses this: HR Administrators

Maintain the list of service contracts with medical providers used throughout the system.

 [INSERT SCREENSHOT: The 11.6 Service Contracts list screen — grid of service contracts with medical providers, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Medical Benefit** → **Service Contracts (/medicalContract)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash () icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" service contracts with medical providers codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 12

Insurance

Insurance mirrors the Medical Benefit pattern: policies, and a claim process routed through HR then Finance.

12.1 My Insurance Claims

Menu: Insurance → My Insurance Claims (/myInsuranceClaims) Who uses this: Any covered employee (self-service)

Submit and track your own insurance claims.

 [INSERT SCREENSHOT: The My Insurance Claims screen — your claim history and a submission form with document attachments.]

Steps

1. Open **Insurance** → **My Insurance Claims** and click **+ Add**.
2. Describe the claim, enter the amount, and attach supporting documents.
3. **Submit** — it routes through HR then Finance for approval.

12.2 Insurance Claims

Menu: Insurance → Insurance Claims (/insuranceClaim) Who uses this: HR Administrators, Finance

Maintain the list of the administrative queue of all insurance claims used throughout the system.

 [INSERT SCREENSHOT: The 12.2 Insurance Claims list screen — grid of the administrative queue of all insurance claims, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Insurance** → **Insurance Claims (/insuranceClaim)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” the administrative queue of all insurance claims codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

12.3 Insurance Policies

Menu: Insurance → Insurance Policies (/insurancePolicy)

Who uses this: HR Administrators

Maintain the list of insurance policies and premium schedules used throughout the system.

 [INSERT SCREENSHOT: The 12.3 Insurance Policies list screen — grid of insurance policies and premium schedules, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Insurance** → **Insurance Policies (/insurancePolicy)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” insurance policies and premium schedules codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 13

Employee Loan

Employee Loan lets staff request a loan against defined limits, with guarantors where required, and a repayment schedule deducted automatically from pay.

13.1 My Loans

Menu: Employee Loan → My Loans (/myLoans) Who uses this: Any eligible employee (self-service)

Request a loan, add guarantors, give consent, and track repayment progress.

 [INSERT SCREENSHOT: The My Loans screen — your loan history with outstanding balance and progress, and a request form with a guarantor sub-section.]

Steps

1. Open **Employee Loan** → **My Loans** and click **Request Loan**.
2. Select the **Loan Type**, enter the requested amount (checked automatically against your eligibility limit), and add any required **Guarantors**.
3. Confirm consent where prompted, and **Submit** — the request routes through HR → Finance → Executive approval.
4. Once approved and disbursed, track your outstanding balance and repayment progress on this screen.

TROUBLESHOOTING

"I can't find a colleague as a guarantor" The guarantor must be an active employee in the system. Confirm the spelling of their name, or ask them to check their employment status with HR.

13.2 Employee Loans

Menu: Employee Loan → Employee Loans (/loan) Who uses this: HR Administrators, Finance

Review, approve, disburse, and record repayments for every loan in the organization.

 [INSERT SCREENSHOT: The 13.2 Employee Loans list screen — grid of the administrative register of all loans, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Employee Loan** → **Employee Loans (/loan)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.

5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the administrative register of all loans codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

13.3 Loan Types

Menu: Employee Loan → Loan Types (/loanType)

Who uses this: HR Administrators

Maintain the list of loan types and their limits/terms used throughout the system.

 [INSERT SCREENSHOT: The 13.3 Loan Types list screen — grid of loan types and their limits/terms, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Employee Loan → Loan Types (/loanType)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" loan types and their limits/terms codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 14

Guarantee Commitments

Tracks formal guarantee commitments an employee makes toward an external organization (for example, a bank guarantee), through to release.

14.1 My Guarantees

Menu: Guarantee Commitments → My Guarantees (/myGuarantees)

Who uses this: Any employee (self-service)

Submit and track your own guarantee commitments.

 [INSERT SCREENSHOT: The My Guarantees screen — your commitments with status, and a submission form.]

Steps

1. Open **Guarantee Commitments** → **My Guarantees** and click **+ Add**.
2. Enter the external organization, the commitment amount, and its purpose.
3. **Submit** for approval.

14.2 Guarantee Register

Menu: Guarantee Commitments → Guarantee Register (/employeeGuarantee)

Who uses this: HR Administrators

Review, approve, and release guarantee commitments once the underlying obligation is settled.

 [INSERT SCREENSHOT: The 14.2 Guarantee Register list screen — grid of the administrative register of every guarantee commitment, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Guarantee Commitments** → **Guarantee Register (/employeeGuarantee)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the administrative register of every guarantee commitment codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 15

Trip Management

Trip Management handles business travel: per-diem calculation, cash advances, expense tracking, and settlement once the trip is complete.

15.1 My Trips

Menu: Trip Management → My Trips (/myTrips) Who uses this: Any employee (self-service)

Request business travel, receive your calculated per-diem and advance, log expenses during the trip, and settle when you return.

 [INSERT SCREENSHOT: The My Trips screen — your trip list with status, and a trip request form showing dates, destination (Local/International), an auto-calculated per-diem amount, and an advance request.]

Steps

1. Open **Trip Management** → **My Trips** and click **Request Trip**.
2. Enter the destination, trip type (**Local** or **International**), and travel dates — the system automatically calculates the per-diem entitlement based on your grade and the configured rate.
3. Request an advance if needed, then **Submit**. Local trips route through HR; International trips route through HR then Executive approval.
4. Once approved, HR disburses the advance — track this on your trip's detail screen.
5. During or after the trip, log actual expenses against the trip.
6. When travel is complete, click **Settle Trip** — the system nets your logged expenses against the advance and shows the balance due either way.

TIP

A trip's budget is checked against the configured **Travel Budget** for the relevant fiscal year and unit — if a trip is blocked, the budget may be exhausted; contact your Trip/Finance administrator.

15.2 Business Trips

Menu: Trip Management → Business Trips (/trip) Who uses this: HR Administrators, Finance

Review, approve, disburse advances for, and settle every trip in the organization.

 [INSERT SCREENSHOT: The 15.2 Business Trips list screen — grid of the administrative register of all trips, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Trip Management** → **Business Trips (/trip)** from the sidebar.

2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the administrative register of all trips codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

15.3 Travel Budgets

Menu: Trip Management → Travel Budgets (/tripBudget)

Who uses this: Finance, HR Administrators

Maintain the list of travel budget allocations by fiscal year and unit used throughout the system.

 [INSERT SCREENSHOT: The 15.3 Travel Budgets list screen — grid of travel budget allocations by fiscal year and unit, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Trip Management → Travel Budgets (/tripBudget)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" travel budget allocations by fiscal year and unit codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

15.4 Per-diem Rates

Menu: Trip Management → Per-diem Rates (/perDiemRate)

Who uses this: HR Administrators

Maintain the list of per-diem rates by grade and trip type (Local/International) used throughout the system.

 [INSERT SCREENSHOT: The 15.4 Per-diem Rates list screen — grid of per-diem rates by grade and trip type (Local/International), with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Trip Management → Per-diem Rates (/perDiemRate)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” per-diem rates by grade and trip type (Local/International) codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 16

Attendance & Leave

This chapter walks through requesting leave — the single most common self-service action in the system — along with the balance ledger and the administrative settings behind it.

16.1 Requesting Annual Leave

Menu: Attendance & Leave → Annual Leave (/annualLeave) Who uses this: Any employee (self-service); HR Administrators (on behalf of employees)

Submit a request to take annual leave against your accrued balance. A request is never automatically approved — it always routes through your configured approval chain, and your balance is only deducted once every step approves.

 [INSERT SCREENSHOT: The Annual Leave screen — the request list at the top with status (Pending, Approved, Rejected, Cancelled) and a ****+ Add**** button; the request form below showing the ****Annual Leave Ledger**** dropdown, a ****Remark**** field, and a **Leave Lines** table where date ranges are added.]

Steps

1. Open **Attendance & Leave → Annual Leave**.
2. Click the **+** button to start a new request.
3. If you have not already selected yourself as the employee, do so first — the **Annual Leave Ledger** dropdown then populates with your available leave ledger(s) (it stays disabled with a **"Pick an employee first"** hint until then).
4. Select the **Annual Leave Ledger** to charge — this fixes the leave type and fiscal year the request draws from.
5. In the **Leave Lines** table, click to add a line: choose **Full Day** or **Half Day**, then set the **Start Date** and **End Date** using either the Gregorian or Ethiopian calendar picker (both stay in sync). Add more lines for non-consecutive periods within the same request.
6. The number of working days for each line, and the running total, calculates automatically — weekends and holidays are excluded.
7. Add an optional **Remark** explaining the request.
8. Click **Save**. The request is created with status **Pending** and enters the approval workflow; you will see it move through its steps and finally to **Approved** or **Rejected**.
9. You may **Cancel** a request from the list while it is still Pending or Approved but not yet taken.

Field notes

- Half-day lines let you pick **Morning** or **Afternoon**.
- Your available balance (**Ledger Available**) is shown on the form so you can see what you have left before submitting.
- Some leave types cap the number of consecutive days per request line — if you hit that limit, split the request into shorter lines or contact HR.

TROUBLESHOOTING

"Insufficient balance" You are requesting more days than your ledger currently shows available. Check the **Annual Leave Ledger** self-service screen (16.3) or your Employee Profile's Annual Leave tab for your exact balance.

"No active approval workflow is configured" This is a setup issue for HR/System Administrators to resolve (see Chapter 18) — it is not something you can fix from the request form.

"A line overlaps a date range you already have pending or approved" You already have a request covering some of the same dates. Check your existing requests in the list, or cancel/adjust one of them first.

"These dates overlap the existing fiscal year ..." This message appears to administrators configuring **Fiscal Years** (16.7), not to employees requesting leave — each fiscal year must start the day after the previous one ends, with no shared days.

16.2 Other Leave

Menu: Attendance & Leave → Other Leave (/otherLeave) Who uses this: Any employee (self-service); HR Administrators

Request non-annual leave types (for example, sick leave, maternity/paternity leave, or other statutory leave) — some types are gender-restricted or granted as a fixed lump sum rather than day-by-day.

 [INSERT SCREENSHOT: The Other Leave screen — similar to Annual Leave, with a Leave Type selector and multi-day request lines.]

Steps

1. Open **Attendance & Leave** → **Other Leave** and click +.
2. Select the **Leave Type** — only types applicable to you (e.g. matching your gender, where restricted) will be selectable.
3. Add your date line(s), or for lump-sum leave types, confirm the fixed entitlement being used.
4. Add a **Remark** if relevant and click **Save** to submit for approval.

Field notes

- Other Leave balances are tracked separately from your Annual Leave ledger and do not affect it.

16.3 Annual Leave Ledger

Menu: Attendance & Leave → Annual Leave Ledger (/annualLeaveLedger) Who uses this: HR Administrators; employees view their own via their profile

The full transaction history behind every employee's leave balance — accruals, deductions, carry-forwards, and expiries — and the screen HR uses to generate entitlements at the start of a fiscal year.

 [INSERT SCREENSHOT: The Annual Leave Ledger screen — an employee/fiscal-year filter, a running balance summary, and a transaction list; a ****Generate Entitlements**** action for the selected fiscal year.]

Steps

1. Open **Attendance & Leave** → **Annual Leave Ledger**.
2. Select an employee and fiscal year to review their transaction history and current balance.
3. HR Administrators: at the start of a fiscal year, use **Generate Entitlements** to calculate and post the year's accrual for every eligible employee in one action.

TIP

If an employee's balance looks wrong, check this ledger first — every adjustment (accrual, deduction, carry-forward, expiry) is listed individually with its date and reason, so you can trace exactly what happened.

16.4 Leave Types

Menu: Attendance & Leave → Leave Types (/leaveType)

Who uses this: HR Administrators

Define each kind of leave (Annual, Sick, Maternity, etc.) and its basic rules — paid/unpaid, gender restriction, and whether it requires approval.

 [INSERT SCREENSHOT: The 16.4 Leave Types list screen — grid of leave types, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Attendance & Leave** → **Leave Types (/leaveType)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" leave types codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

16.5 Leave Settings

Menu: Attendance & Leave → Leave Settings (/annualLeaveSetting)

Who uses this: HR Administrators

Set the annual entitlement, carry-forward cap, and maximum consecutive days allowed per request for a given fiscal year.

 [INSERT SCREENSHOT: The 16.5 Leave Settings list screen — grid of the annual leave policy for a fiscal year, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Attendance & Leave** → **Leave Settings (/annualLeaveSetting)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash () icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

“This name already exists” the annual leave policy for a fiscal year codes/names must be unique. Change the code or name slightly and save again.

“Cannot delete this record” The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

16.6 Other Leave Settings

Menu: Attendance & Leave → Other Leave Settings (/otherLeaveSetting)

Who uses this: HR Administrators

Maintain the list of policy settings for each non-annual leave type used throughout the system.

 [INSERT SCREENSHOT: The 16.6 Other Leave Settings list screen — grid of policy settings for each non-annual leave type, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Attendance & Leave** → **Other Leave Settings (/otherLeaveSetting)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.

6. To remove a record, click the trash (🗑️) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" policy settings for each non-annual leave type codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

16.7 Holidays

Menu: Attendance & Leave → Holidays (/holiday)

Who uses this: HR Administrators

Holidays entered here are automatically excluded when the system calculates working days for a leave request.

 [INSERT SCREENSHOT: The 16.7 Holidays list screen — grid of the public holiday calendar, with the **+ Add** button top-right and search/filter bar above the grid.]

Steps

1. Open **Attendance & Leave → Holidays (/holiday)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue + button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑️) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the public holiday calendar codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

16.8 Work Week

Menu: Attendance & Leave → Work Week (/workWeekConfiguration)

Who uses this: HR Administrators

Maintain the list of the organization's working-day configuration (which days count as weekend) used throughout the system.

 [INSERT SCREENSHOT: The 16.8 Work Week list screen — grid of the organization's working-day configuration (which days count as weekend), with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Attendance & Leave** → **Work Week (/workWeekConfiguration)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil () icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash () icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the organization's working-day configuration (which days count as weekend) codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

16.9 Fiscal Years

Menu: Attendance & Leave → Fiscal Years (/fiscalYear)

Who uses this: HR Administrators

Define the fiscal year periods leave accrual and reporting run against. Fiscal years must be contiguous with no shared days.

 [INSERT SCREENSHOT: The Fiscal Years list and form — name, start date, end date, and an Active/Closed status.]

Steps

1. Open **Attendance & Leave** → **Fiscal Years** and click **+ Add**.
2. Enter a name, **Start Date**, and **End Date**, then **Save**.
3. Mark the current period **Active**; a closed prior year becomes read-only except for rollover.

Field notes

- Each fiscal year covers its start and end dates inclusively, so the next year must begin the day immediately after the previous one ends — the system will reject overlapping dates and tell you which existing year conflicts.

TROUBLESHOOTING

“The date range overlaps an existing fiscal year” Your new year's start date must be exactly one day after an adjacent year's end date. The error message names the specific conflicting fiscal year and its exact range so you can adjust.

CHAPTER 17

Reports

The Reports module gives access to a library of predefined, parameterized reports across every HR area, without needing a developer for each new report.

17.1 Reports

Menu: Reports → Reports (/reports)

Who uses this: HR Administrators, Managers (as permitted)

Browse and run the available reports, filling in whatever parameters each report needs, then view or export the result.

 [INSERT SCREENSHOT: The Reports screen — a report picker on the left, and on the right a parameter panel (date ranges, department filters, and similar) above the resulting data grid/output.]

Steps

1. Open **Reports** → **Reports**.
2. Choose a report from the list.
3. Fill in the parameters shown (these vary by report — commonly a date range and/or a department/unit filter).
4. Click **Run** (or equivalent) to generate the result.
5. Use any export option available to download the result.

TIP

If a report you need doesn't exist yet, ask a System Administrator about **Report Definitions** (17.2) — new reports are configured, not custom-coded.

17.2 Report Definitions

Menu: Reports → Report Definitions (/reportDefinition)

Who uses this: System Administrators

Maintain the list of the underlying report definitions (which data source, fields, and filters each report exposes) used throughout the system.

 [INSERT SCREENSHOT: The 17.2 Report Definitions list screen — grid of the underlying report definitions (which data source, fields, and filters each report exposes), with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **Reports** → **Report Definitions (/reportDefinition)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.

4. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
5. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
6. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"This name already exists" the underlying report definitions (which data source, fields, and filters each report exposes) codes/names must be unique. Change the code or name slightly and save again.

"Cannot delete this record" The record is referenced elsewhere in the system (e.g. an employee, position, or request is linked to it). Remove or reassign those references first, or simply mark it inactive if the screen offers that option.

CHAPTER 18

Approvals & Workflow

Nearly every request in CyberHRMS — leave, transfers, recruitment, claims, loans, and more — is governed by the same underlying approval engine. This chapter explains how to act on approvals and how administrators configure the chains themselves.

18.1 Acting on Approvals

Menu: Dashboard → Approvals tab, or System → Workflow Tracking (/workflow) Who uses this: Anyone assigned as an approver

Whenever a request needs your decision, you'll be notified (the bell icon) and it appears both on your **Dashboard's** Approvals tab and on the full **Workflow Tracking** screen.

 [INSERT SCREENSHOT: The Approve/Reject dialog — the request summary, an optional **Comment** field, and **Approve** / **Reject** buttons.]

Steps

1. Open your **Dashboard** and check the **Approvals** tab (only visible when something is waiting on you), or go to **System** → **Workflow Tracking** for the full list of every request currently in progress.
2. Click a pending item to open it, or use the inline **Approve** / **Reject** action directly from the list.
3. Add an optional **Comment** explaining your decision (recommended, especially for a rejection).
4. Click **Approve** to move the request to its next step (or complete it, if you're the final approver), or **Reject** to stop it and return it to the requester.

Field notes

- A request only takes effect (leave balance deducted, transfer applied, claim paid, etc.) after its **final** approval step — nothing changes partway through the chain.
- You can always see a request's full decision history — who approved or rejected each step, and any comments left — from its detail screen.

TIP

If you are the most senior person in your reporting line (for example, a CEO with no manager above you), a step that would normally route to "your manager" is automatically skipped, and the request moves straight to the next step — you do not need to do anything special.

18.2 Workflow Definitions

Menu: System → Workflow Definitions (/workflowDefinition) Who uses this: System Administrators

Define, for each process (Annual Leave, Transfer, Loan, and so on), the ordered steps and who is authorized to approve each one.

 [INSERT SCREENSHOT: The 18.2 Workflow Definitions list screen — grid of the configured approval chains for each process, with the ****+ Add**** button top-right and search/filter bar above the grid.]

Steps

1. Open **System** → **Workflow Definitions (/workflowDefinition)** from the sidebar.
2. To view or search, use the search box above the grid, or click any column header to sort.
3. To add a new record, click the blue **+** button in the top-right corner of the page.
4. Add ordered steps; for each step, assign a specific user, a role, or a dynamic approver (the requester's Immediate Manager, Second-Level Manager, or a specific unit's manager, resolved automatically at decision time from who currently has the **Managerial** flag on their employee record).
5. Fill in the required fields (marked with a red asterisk) and any optional fields, then click **Save**.
6. To edit an existing record, click the pencil (✎) icon on its row, change the fields, and click **Save**.
7. To remove a record, click the trash (🗑) icon on its row and confirm **Delete** in the dialog that appears.

TROUBLESHOOTING

"A submission fails saying no manager can be resolved for a step" The relevant organizational unit (or any of its parent units) has no employee flagged **Managerial** in that chain. Fix it by opening the appropriate employee's record under Personnel → Employees and checking their **Managerial** flag on the Employment tab.

APPENDIX A

Roles & What They Can See

What appears on your screen — which employees you can view, which requests land in your Approvals tab — depends on your role. The table below summarizes the common patterns used throughout this manual.

COMMON ACCESS PATTERNS

ROLE	TYPICAL ACCESS
Employee (self-service)	Full access to their own profile and requests; can view and act only on items where they are the subject, an invited peer reviewer, or an assigned approver.
Manager	Everything an employee has, plus visibility into their own unit and its sub-units (direct and indirect reports), and approval rights on steps assigned to "Immediate Manager" / "Second-Level Manager".
HR Administrator	Organization-wide visibility across HR modules; can configure master data (leave types, position classes, templates, and so on) and act on HR-assigned approval steps.
Finance	Visibility and approval rights on the financial steps of workflows that touch budget — salary revisions, loans, claims, trip advances/settlements.
Executive	Final-stage approval rights on higher-value or higher-risk requests (large salary revisions, international trips, senior loans) as configured.
System Administrator	Full configuration access: users, roles, permissions, workflow definitions, and system-wide settings.

If a screen or button you expect to see is missing, it is most likely a permissions setting — contact your HR or System Administrator rather than assuming something is broken.

APPENDIX B

Troubleshooting Quick Reference

The messages below are collected here for quick lookup; each also appears in context within its chapter.

COMMON MESSAGES

YOU SEE...	WHAT IT MEANS / WHAT TO DO
Invalid username or password	Check Caps Lock and retype. If it persists, ask your administrator to confirm your account and reset your password.
Insufficient balance	The request exceeds your available leave/loan/budget balance. Check the relevant ledger or limit screen before resubmitting.
No active approval workflow is configured	A required approval chain hasn't been set up yet for this process. This is an administrator task — see Workflow Definitions (18.2).
A line overlaps a date range you already have pending or approved	You already have an overlapping request. Review your existing requests before submitting a new one.
Requested positions exceed available vacancy	There aren't enough vacant seats for what you're requesting. Check Establishment Overview (4.2) or raise a Workforce Plan (4.1) first.
Cannot delete this record	The record is still referenced elsewhere (an employee, a request, another linked record). Reassign or remove those references, or mark it inactive instead of deleting.
This name already exists	Codes/names in that list must be unique — adjust and save again.
No manager can be resolved for a step	No employee in the relevant unit (or its parent units) has the Managerial flag set. Set it on the appropriate employee's record.
A request seems "stuck" with no visible next action	Check who the current approver is on the request's detail screen and confirm with them directly — some steps are only actionable by a specific person or role.

APPENDIX C

Glossary

TERM	MEANING
Ledger	The running balance record for an employee's leave, tracking every accrual, deduction, and adjustment as individual transactions.
Position vs. Position Class	A Position Class is a reusable job definition (title, grade, requirements); a Position is one actual seat in a specific unit that references a Position Class.
Workflow / Approval Chain	The ordered sequence of approval steps a request must pass through before it takes effect.
Dynamic approver	An approval step resolved automatically at decision time — e.g. "the requester's Immediate Manager" — rather than a fixed named person.
Establishment	The full set of defined positions across the organization, whether filled or vacant.
Clearance	The checklist process, run department by department, confirming a departing employee has returned assets or settled obligations before their exit is finalized.
Fiscal Year	The accounting/HR period (not necessarily the calendar year) that leave accrual and several other calculations run against.
Self-service	A screen an employee uses to manage their own information or requests directly, without going through HR.
